# TOPBACKUP CLOUD CONNECT

EFFICIENT TRANSFER OF BACKUPS TO THE CONOVA DATA CENTERS

Transfer backups of physical and virtual systems with an end-to-end encryption to external storage locations without the cost and complexity of developing and maintaining an external infrastructure. Control is done centrally via the existing Veeam backup infrastructure. Make the most of modern backup technology with backup copy jobs and integrated WAN acceleration, the possibility of unlimited incremental backups, GFS storage guidelines (grandfather-father-son), and more.

" Highlights at a glance

- External backup location according to 3-2-1 backup strategy
- conova certified according to EN 50600 and ISO 27001
- Fully integrated with existing backup technology from Veeam Software
- Restore entire VMs, VM files, and hard drives with just a few clicks
- End-to-end encryption of your backups
- Scalable use of backup capacity in the data center
- Integrated WAN accelerator for efficient transfer of backups
- Complete transparency and control for the customer

TopBackup Cloud Connect	
Backupspace included	100 GB
Maximum bandwidth	1 GBit
Backup technology	Veeam Cloud Connect
Price per month	upon request
Set-up costs (one-time expense)	upon request
Per workstation per month (optional)	upon request
Per virtual server per month (optional)	upon request
Per physical server per month (optional)	upon request
Backupspace per TB per month	upon request

Notes:
- In the initial order, a minimum quantity is defined for the backup space and the number of backed-up servers/workstations. Beyond this, billing is variable.
- Minimum contract period of 36 months.
